

Sequence Diagram

Week9 : Software Engineer Lab

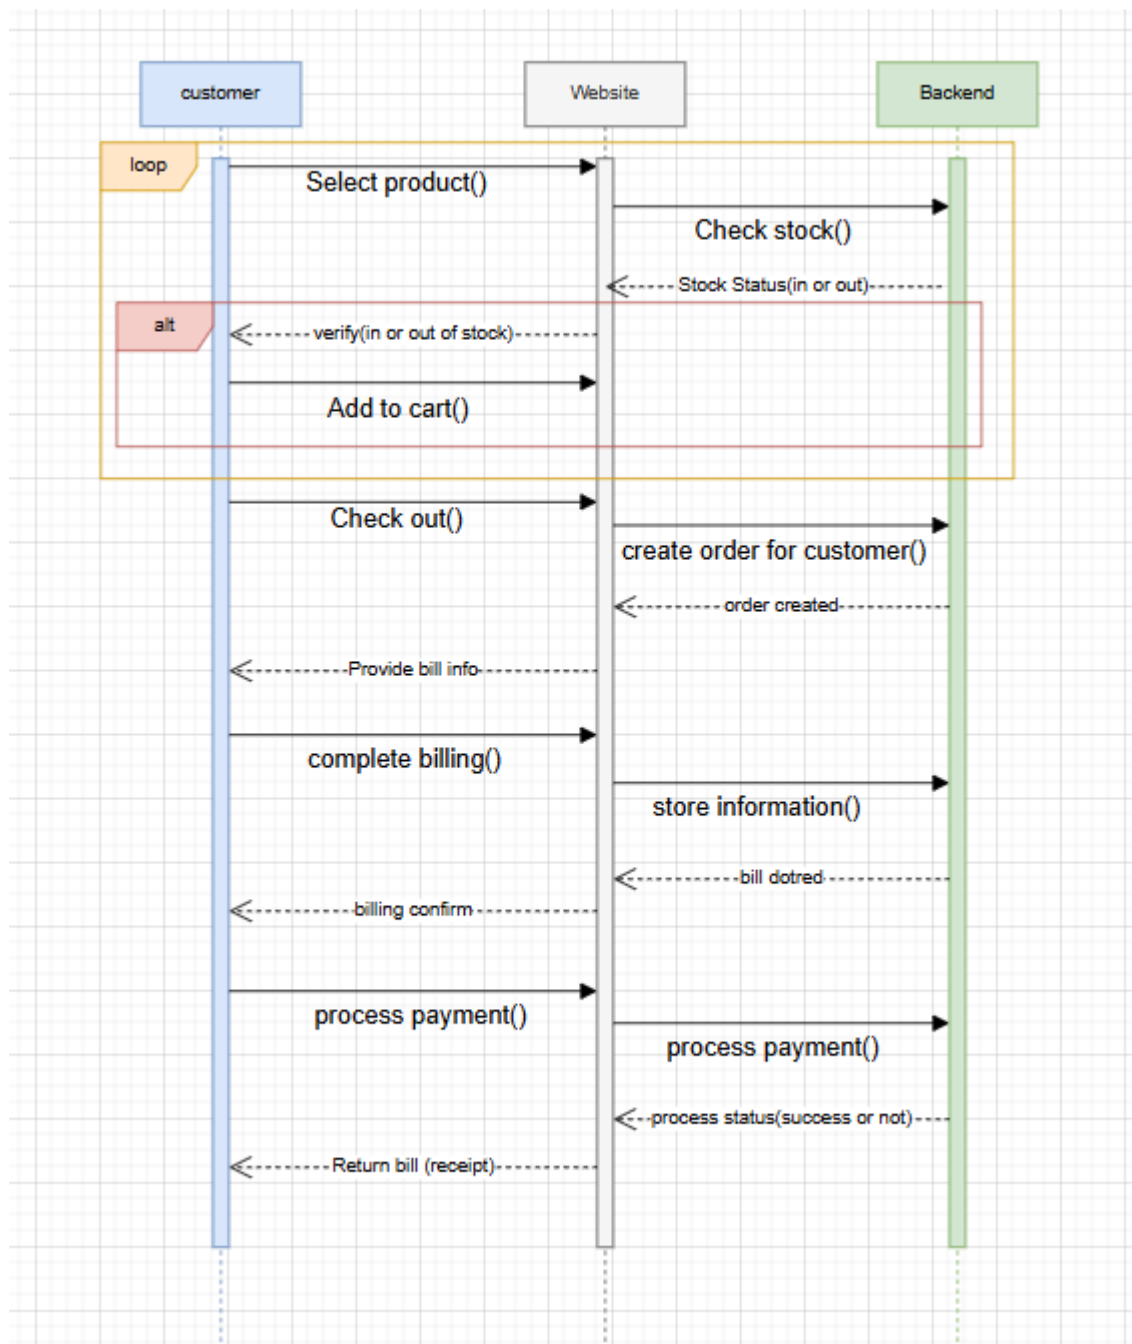

Prepared By:
G1 - IDTB110380 Vun Devit

Prepared For:
Lect. Ms.Kimhuoy Yann

Exercise 2: Online Shopping

Design a sequence diagram for a process of online shopping by considering the information as following:

- ❑ Customer can select product from the website to add to cart
- ❑ Before adding any product to cart, we have to verify whether product is in stock
- ❑ Once customer has finished his or her order, he or she will check out
- ❑ After check out, customer will need to provide the billing information and these information will be stored in his or her order
- ❑ Then, customer can proceed to the payment and the system will return the bill to customer

Exercise 3: School Library

Draw a sequence diagram to represent the process of borrowing books from the library at your school.
